

TEAM INVOLVEMENT IN DEMONSTRATION

Project Title

Rising Waters

Project Subtitle

AI-Powered Flood Prediction System using Machine Learning

Introduction

The demonstration of the Rising Waters project was planned to clearly present the working of the AI-powered Flood Prediction System. Each team member contributed to different activities such as development, testing, documentation, deployment, and project presentation to ensure a successful demonstration.

Team Responsibilities

Project Development

- Developed the Streamlit web application.
- Integrated the Machine Learning model.
- Designed the user interface.

Machine Learning

- Collected and prepared the dataset.
- Trained the XGBoost prediction model.
- Evaluated model performance.

Testing

- Tested application functionality.
- Verified prediction accuracy.
- Fixed bugs and improved stability.

Documentation

- Prepared project documentation.
- Created project reports.
- Maintained GitHub repository.

Demonstration

- Explained project objectives.
 - Demonstrated application features.
 - Presented prediction results.
 - Answered project-related questions.
-

Demonstration Activities

- Introduction to Rising Waters.
 - Problem Statement explanation.
 - Dataset overview.
 - Machine Learning model explanation.
 - Live application demonstration.
 - Prediction using sample inputs.
 - Result interpretation.
 - Future enhancement discussion.
-

Outcome

The demonstration successfully showcased the complete workflow of the Rising Waters application. The project achieved accurate flood prediction, smooth application performance, and a clear explanation of all major features.

Benefits

- Better understanding of the project.
- Effective teamwork.

- Professional presentation.
 - Improved communication.
 - Successful project demonstration.
-

Conclusion

The team worked together effectively throughout the project demonstration. Proper coordination, clear communication, and active participation ensured that the Rising Waters project was presented successfully and all project objectives were clearly explained.
